PMP®-certified professional with a unique blend of technical execution and business strategy. Currently delivering digital systems and automation solutions at Qatar University, backed by an MSc in Business Management and prior industry experience across the UK and Qatar. Actively seeking Project/Product Management opportunities.

COVER LETTER

29 July 2026

Dear Hiring Manager,

I am writing to express my interest in Project Management roles within your organization. Having recently attained my PMP® certification, I am now looking to formally transition into a dedicated Project/Product Management capacity, building on a career that has consistently placed me at the intersection of technology delivery and business strategy.

My background spans enterprise application consulting, digital systems development, and cross-functional delivery. As an Application Consultant at Clarivos, I designed and implemented Tagetik EPM solutions for clients across Europe, streamlining financial planning and reporting processes that directly supported strategic business objectives. In my current role at Qatar University's Communications & Public Relations Department, I operate as a Digital Systems & Automation Specialist, managing web content, digital signage infrastructure, and workflow automation within a Microsoft 365/SharePoint environment, while coordinating across departments and IT Services to deliver reliable digital solutions.

Alongside this, I founded LunaraHR, an AI-driven HR management system, giving me firsthand experience leading a project end-to-end, from architecture through delivery. This, combined with an MSc in Business Management from the University of Surrey and a B.Tech in Computer Science Engineering from NIT Jalandhar, has shaped me into someone equally comfortable in technical execution and business-facing coordination.

What I believe makes me a strong fit for a project-focused role is precisely this mix: the technical depth to understand what a delivery team is actually building, the business grounding to translate that into stakeholder value, and now the formal PMP® framework to structure and govern that work. I am not approaching project management as an unfamiliar discipline, but as the natural next step in work I have already been doing in practice.

I would welcome the opportunity to discuss how this combination of technical fluency, business acumen, and PMP®-certified project discipline could contribute to your team's goals.

Sincerely,

Sooraj Manohar
